## RE: National Biosolids Partnership EMS Certification

Dear Andrew:

On behalf of the National Biosolids Partnership (NBP), a voluntary partnership of the National Association of Clean Water Agencies, Water Environment Federation, and U.S. Environmental Protection Agency, I congratulate you and your dedicated staff on the successful completion and certification of the Camden County, NJ Municipal Utility Authority's Biosolids Environmental Management System (EMS). Your facility is the 31st organization in the U.S, and first wastewater agency in New Jersey that has earned the NBP's "Seal of Approval" by leading the way to excellence through your EMS program.

The Seal of Approval recognizes that the Camden County MUA has met all of the requirements of certification for admittance to the NBP EMS program, as verified on September 19, 2010 by an NBP accredited auditing firm, KEMA-Registered Quality, Inc. The independent audit verified that the Camden County MUA:

- has an effective biosolids environmental management system that supports continually improving environmental performance,
- exceeds regulatory compliance obligations,
- utilizes good biosolids management practices, and
- creates meaningful opportunities for public participation

Thank you for being a leader and a model to other wastewater treatment agencies nationwide who want to strive for continuous environmental improvement. Please convey NBP's appreciation to your staff and others who have worked so diligently to meet the voluntary NBP EMS program requirements.

Sincerely,

A handwritten signature in black ink that reads "R Lanyon". The signature is written in a cursive, flowing style.

Richard Lanyon  
Chair, National Biosolids Partnership
