Andrew H. Kricun
Deputy Executive Director/Chief Engineer
Camden County Municipal Authority
1645 Ferry Avenue
Camden, New Jersey 08104

RE: NBP EMS Certification

Dear Andrew:

On behalf of the Water Environment Federation, I want to congratulate you and the staff of the Camden County Municipal Utility Authority on the successful completion and verification of the requirements for certification and admittance to the National Biosolids Partnership's environmental management system (EMS) program. Your organization is the 31st in the nation to achieve this distinction.

As a new organization admitted to the NBP EMS program, the Camden County Municipal Utility Authority has now earned the Partnership's "Seal of Approval." This designation recognizes that your agency has met the entire NBP EMS program requirements that support excellence in biosolids management, exceeds or augments regulatory compliance obligations, and provides meaningful opportunities for public participation.

I have a good understanding of the effort that has been made to satisfy the NBP requirements – Documentation, Commitment, Operation, and Verification. The Federation believes that instituting an EMS for utility management is vital to enhancing environmental excellence in local communities. Camden County Municipal Utility Authority has done a terrific job!

WEF believes that your audited facility will be viewed as a model by those wastewater agencies and organizations following the EMS path. The NBP and WEF are very pleased to have the Camden County Municipal Utility Authority as a leader in this national and international effort.

Sincerely,

William Bertera
Executive Director, Water Environment Federation
