

**New Jersey Environmental Infrastructure Financing Program
Project No. S340-640-23**

Construction of upgrades and improvements to the City of Camden’s combined sewer system, the Dredging of Nine of Camden City’s Combined Sewer Overflow Outfalls, located within the City of Camden, with a capital cost of \$5,570,000 was financed by the New Jersey Environmental Infrastructure Financing Program (NJEIFP). The NJEIFP is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Environmental Infrastructure Trust (Trust) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Trust to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by dredging nine of Camden City’s combined sewer overflows in order to restore them to their design functionality and, thereby, reduce combined sewage flooding for residents and businesses in Camden.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
