

NEW JERSEY ENVIRONMENTAL INFRASTRUCTURE FINANCING PROGRAM PROJECT No. S340640-33

Construction of upgrades and improvements to Delaware No. 1 Water Pollution Control Facility, Preliminary Treatment Facility Upgrades, \$15,394,377.00 were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by replacing aging bar screens and grit washers with new and more efficient equipment, allowing better debris and solids removal from incoming waste water flow, prolonging equipment life downstream, lessening downtime of treatment processes and enhancing water quality effluent for residents and businesses in Camden County.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
